ABOUT ADDON - LTE/GPS (M8)

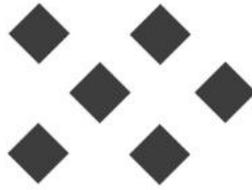

SKU: RB_AOLG8

The LTE/GPS Add-On by REBOTNIX combines high-precision RTK GPS with powerful LTE cellular connectivity in a single compact module – delivering centimeter-accurate real-time positioning and reliable wide-area data transmission, even in remote and challenging environments.

The RTK GPS module supports GPS, GLONASS, Galileo, BeiDou, and QZSS with update rates up to 30 Hz, while the integrated LTE module ensures stable connectivity via mobile networks independent of local infrastructure.

A dedicated diversity/MIMO antenna further improves cellular performance. The rugged black anodized aluminum housing combines modern design with exceptional robustness. Fully CE and FCC certified for international compliance
